

Tips for Using EBSCO eBooks

1. You can read an entire EBSCO eBook within your web browser.
2. You can also save/ print/ email sections of the eBook as PDF files.
3. If you're only going to be reading specific chapters, you may want to browse the table of contents, click through the desired chapters, and download, email or PDF those chapters. Depending on the publisher, you can generally download 60 pages or more from an eBook without having to create a MyEBSCO or eBrary Bookshelf account, and those files will not expire or disappear from your computer like a full EBSCO eBook file that has been downloaded & borrowed.
4. You will also not need to download Adobe Digital Editions or reset your Adobe ID if you're just downloading or emailing sections of an eBook to your computer.

Tips for Downloading & Reading EBSCO eBooks on an iPad (or iPod, iPhone, or most Android mobile devices)

1. Create a MyEBSCO account for downloading/checking out EBSCO eBooks, if you have not done so already.
If you do not remember your password, you will need to reset your password; if your login has become inactive, you will need to choose a new login. You can have multiple logins corresponding with one [RMU] email address.
2. Go to the AppStore on your mobile device, and download and install the Bluefire e-reader app. Bluefire should prompt you to set up an [Adobe ID](#). Bluefire works with Adobe to allow you to read borrowed eBooks. For more details, please refer to the [EBSCO eBooks help page](#) and to [Bluefire Reader's web site](#).
3. Go to the RMU Library mobile site from you mobile device (<http://library.rmu.edu> should direct you to <http://m.library.rmu.edu>).
4. Scroll down to EBSCO eBooks, click on it, and search for a book by author, title, or keyword. Make sure that the "Download Available" checkbox is checked.
5. Once you find the book you want to download, click to download, you will be prompted for your MyEBSCO login, enter it.
6. Next, select checkout period and format (EPUB or PDF; for most eBooks and most devices, EPUB is recommended). Finally, a download page message will appear, (and if you've installed Bluefire), you can select "Open in Bluefire," and select "Read now," or "Read later."
